SCDI   2025

AI in the Judiciary and Advocacy in Austria and Germany: Current Trends & Practical Examples

Artificial intelligence is permeating every professional field, and law firms are no exception. Practical demonstrations of the use of AI in the judiciary will be presented to us by

Free registration

MS teams (online)

SIGN UP

You will learn:

What are the latest trends in the development of artificial intelligence technologies, focusing on areas that can be used by the judiciary and advocacy.

What does the automation of work processes in a law firm look like?

Which office technologies are ready for AI deployment.

What does the use of artificial intelligence look like in the Austrian and German justice systems?

The conclusion will belong to your questions, which the experts present will be happy to answer.

We look forward to your participation.

Workshop program:

Speakers

9:00   Introductory word

Emil Fitoš
Managing Director, SCDI

Roland Sommer
He is the director of the Austrian digital innovation hub AI5 Production. AI5 production is one of the four Austrian EDIHs that belong to the European EDIH network. The center offers Austrian manufacturing companies (up to 3,000 employees) extensive free services for digital transformation. In the introduction, he will focus on the latest trends in the development of artificial intelligence technologies with a focus on areas that can be used by the judiciary and advocacy.
